CHASSIS FOR TINY HOUSES
THE FOUNDATION FOR YOUR MOBILE HOME
Quality, innovation in product and process as well as reliability and sustainability in our internal and external customer relations. That is the basis of our pursuit of sustainable growth and quality leadership in our business fields. We have been making our contribution to the DexKo Group, the world’s leading manufacturer of axles and chassis components in the lightweight segment, since 2016.

We are proud that, together with DexKo, we are continuing to successfully shape this development and convey our brand promise of quality, safety and comfort for our products and services to the world.
CHASSIS FOR TINY HOUSES
THE FOUNDATION FOR YOUR MOBILE HOME

Mobile. Flexible. Modular.
Changing lifestyle concepts also require new living concepts. We offer the stable foundation for life on wheels. Intelligent manufacturing concepts and decades of experience in the production of high-quality chassis components for trailers guarantee particularly good quality and durability.

MODULAR FRAME CONCEPT
The modular frame concept allows different body lengths and customised configurations.

PATENTED CONNECTION
The positive-locking connection points ensure perfect connections to the chassis. In the area of the body’s contact surfaces, round head screws are used so that only a small interference contour is created.

HEAVY DUTY SUPPORTS
The chassis is equipped with precisely adapted supports. Other AL-KO support systems can be optionally used at the prepared mounting points.

LONG SERVICE LIFE
The hot-dip galvanised chassis components guarantee maximum reliable corrosion protection.

AL-KO High-loader chassis 3.5 t (3-axle)
**PRE-TENSIONED FRAME**

Less twisting, less or no warping

**MOVABLE AXLE MODULE**

For subsequent adjustment of the nose load at the hitching point, the our high-loaders’ axle module is designed to be movable and can be moved in a 40 mm grid.

**DIMENSIONAL ACCURACY**

Due to the chassis’s high dimensional accuracy, the body can be pre-fabricated to fit exactly.

**INTEGRATED LIGHTING**

Lighting is already integrated in our chassis.
TECHNICAL DATA & VARIANTS
HIGH-LOADER CHASSIS

Scope of delivery inc.:
- Corner steadies
- Loose crank
- Mud guards
- Lighting
- Automatic jockey wheel
- Tyres: 2-axle vehicles = 195/50 R13C, 3-axle vehicles = 195/55 R10
- Overrun device Profi V
- Coupling head inc. barrel lock

Delivery condition: completely assembled

3-axle vehicle front approx. 200 mm / rear approx. 440 mm
LOW-LOADER CHASSIS

Scope of delivery inc.:
- Corner steadies
- Loose crank
- Mudguards
- Lighting
- Automatic jockey wheel
- Tyres:
  2-axle vehicles = 195/50 R13C
- Overrun device Profi V
- Coupling head
  inc. barrel lock

Delivery condition: completely assembled

AL-KO supplies the chassis completely assembled – the type of approval, e.g. national individual approval, is the customer’s responsibility.
