# UP4 – THE ELECTRONIC SUPPORT SYSTEM

## AN EVOLUTIONARY STEP AHEAD

UP4, the new electronic support system for caravans up to 2.5 t is carefully designed right down to the last detail. And the best of all: UP4 can be retrofitted on your AL-KO CHASSIS at any time.

### One step faster

No matter how fast you can crank: The UP4 electronic support system does it faster. And more conveniently.

### One step more convenient

Lower and adjust the legs simply by remote control. Spares your back. And your nerves.

### One step more stable

With UP4 you compensate unevenness electrically and the BIG FOOT is already included. For secure positioning and greater stability whatever the ground.

### One step more intelligent

Combine the UP4 with the RANGER: Elegant parking and manoeuvring in future with just one remote control.

## MODERN SETUP WITH THE UP4 COMPLETE PACKAGE

### Electronic support system

The high-quality electronic drive allows all 4 supports to be easily extended. Especially practical: The system is suitable for caravans up to 2.5 t and is hot-dip galvanised for long-term corrosion protection. The electric drive is additionally protected by a plastic cover. And for extra anti-theft protection, the special spindle end on the supports ensures that operation can only be performed with a special adapter.

### Big Foot

The premium supports are equipped with the Big Foot from AL-KO. It guarantees optimum stability on any camp site – with no slipping or sinking. Well thought-out: When driving, the steady foot folds up flush with the lower base to save space.

### Combination remote control

The remote control allows you to comfortably control the electronic drive at the push of a button. When the supports have been lowered, they can be adjusted individually to level the caravan. Ideal in combination: The Ranger manoeuvring system can be controlled with the same remote control.

## SCOPE OF SUPPLY

- | 4 premium supports, incl. drive, Big Foot, ground rail for reinforcement
- | 4 bearing bushes
- | 1 adapter as anti-theft protection to prevent unauthorised manual resetting
- | 1 remote control with lanyard and holder
- | 1 control unit
- | Battery disconnection switch with key
- | Mounting material incl. cable sheath
- | Operating and installation instructions

### TECHNICAL DATA UP4

Power supply	12 V DC
Average current consumption	6 amps
Maximum current consumption	24 amps
Remote control transmitter frequency	868 MHz
Additional weight	approx. 17.5 kg system weight approx. 40 kg (without battery)
Min. permitted gross weight of the caravan	800 kg
Max. permitted gross weight of the caravan	2,500 kg
Support power source (battery)	12 V, 20 Ah (min.)
Remote control power source (battery)	PP3 9 V

## OVERVIEW

### UP4

Designation	Additional weight kg	Part no.
UP4	approx. 17.5 kg, system weight approx. 40 kg (without battery)	1731376
